Servicing

Opel Service Plus now makes owning a new Opel Australia even more affordable[1)].

Within the first three years or 45,000 km (whichever occurs first) up to three standard scheduled log book services using Opel Australia genuine parts and factory trained technicians are capped at a low maximum price.

Most vehicles are eligible for Opel Service Plus, however some exclusions do apply. For terms and conditions and vehicle eligibility on Opel Service Plus please refer to opel-australia.com.au or contact your Opel Australia Dealer.

1) Opel Service Plus excludes Government, Rental and Not for Profit Fleet vehicles. Additional service requirements are not included in the Opel Service Plus program.

Distance/time based service intervals

The first service is due at 12 months or 15,000 km (whichever occurs first). Thereafter, at every 12 months or 15,000 km since the last service (whichever occurs first).

Determining the proper service interval

The operating conditions of your vehicle will determine the service interval. Use the time interval or the odometer reading, whichever occurs first, to determine when the service is due. It is important to remember that oils and fluids in your vehicle will deteriorate over time, therefore if your vehicle has not travelled the specified service interval distance, the vehicle must be serviced by time interval.

Under certain operating conditions, your vehicle may require additional servicing to ensure maximum safety, performance and longevity. The additional service requirements typically include more frequent

replacement of lubricating oils for example, engine and transmission fluids and the more frequent inspection of steering, suspension and brake system components.

Your Opel Australia Dealer will be able to determine the appropriate service requirements for your vehicle according to your operating conditions.

Scheduled Services

Information on the required Scheduled Services is provided within this booklet. Each scheduled service is displayed with its due time and kilometres, as well as giving the details of items performed.

After each service, check that the service has been validated with the Dealer's stamp and signature in the space provided. This is important as it not only assists in the determination of voluntary warranty claims, but enhances the value of the vehicle when selling. Service coupons are provided for each service up to the 150,000 km service.

Additional service requirements

If you are driving your vehicle outside of the normal driving operations, you may need to conduct additional servicing. A service coupon and criteria for these additional services can be found in the additional service requirements section of this booklet.

Your Opel Australia Dealer

When it comes to service, remember that your Opel Australia Dealer has the trained personnel and specialised equipment to correctly service your vehicle. Your Dealer invites you to return for all your service needs both during and after the Voluntary Warranty Period.

The safety, economy, emission control, performance and reliability of your vehicle cannot be assured unless regular maintenance is performed, preferably by factory-trained technicians at Opel Australia Dealers.

Voluntary Warranty and service

Subject to your non-excludable Statutory Rights, all maintenance services listed in this handbook, and replacement of service items, are the responsibility of the owner and as such are NOT considered under the provisions of the New Vehicle Voluntary Warranty to be rectified of defective material and workmanship. Items such as wheel alignment, necessary adjustments to drive belts, transmission, clutch and parking brake or any other items which may require servicing due to fair wear and tear are carried out at the owner's cost.

Damage caused by failure to have proper maintenance services carried out in accordance with Opel Australia's specifications may affect your New Car Voluntary Warranty. As a result, it is strongly recommended that such services be carried out by an authorised Opel Australia Dealer or Authorised Service Outlet and that you read the New Vehicle Voluntary

Warranty section previously in this booklet, so that you are aware of the voluntary warranty exclusions.

Service Intervals

Service reminder message

A distance based service reminder message is built into the trip computer. The reminder message first appears 1,000 km before the service is due, giving you time to arrange for the service to be carried out. The message shows on the centre display for approximately 10 seconds whenever the ignition is switched on or off, until the trip computer is reset. When the service is overdue, the message flashes for approximately 10 seconds when the ignition is turned on or off.

It should be noted that the service reminder message applies only for regular distance based service intervals. This message is triggered by a distance calculation and does not calculate time or time from the last service. It is important to remember that whenever the vehicle has not travelled the specified service interval distance within 12 months from the last service, the vehicle must be serviced by time interval.

- **15,000 km service displays** when the vehicle has travelled 14,000 km since it was built.
- **30,000 km service displays** when the vehicle has travelled 29,000 km since it was built.

The service reminder will be reset by your Opel Australia Dealer when the vehicle is serviced.

Remember to consider additional service requirements based on time and driving conditions.
